

NATIONAL WEATHER SERVICE

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

NWS Gray SKYWARN Weather Spotter Training (Virtual)

Help your National Weather Service by becoming a SKYWARN storm spotter! Storm spotters report large hail, damaging wind, tornadoes and flooding. Advanced spotter training will provide enhanced training to previously trained weather spotters to further your knowledge of storm structure, prediction methods and a recap of identification/reporting procedures. This class is available to previously trained summer track SKYWARN spotters only. New weather spotters or spotters that have only taken the winter track, should register for the May 9th or May 17th class.

Where: Your Home

Registration: <https://attendee.gotowebinar.com/register/6331069738957642763>

When: Wednesday, May 4th, at 6:00 PM

Cost: Free to all those interested in Weather!!!

For other training in upcoming months, check out the National Weather Service online at <https://www.weather.gov/gyx/skywarn>. You can contact Donald Dumont Donald.Dumont@noaa.gov for additional information on this training.
